

Practical No : 1

Tutorial Title: Write a C++ program to print Pascal Triangle.

Name of Student: Lohakare Shweta

Class: SY

Div: 2

PRN No: B25ET1099

Batch: B

Program:

```
#include<iostream>
using namespace std;
int fact(int p)
{ int res=1;
  for(int i=p;i>1;i--)
    { res*=i;
    }
  return res;
} int BinoCoef(int n,int r)
{ int res;
  res=fact(n)/(fact(r)*fact(n-r));
  return res;
} void printTriangle(int n)
{ for(int l=0;l<n;l++)
  { for(int m=0;m<=l;m++)
    { cout<<"\t"<<BinoCoef(l,m);
    }
  cout<<endl;}
}
int main()
{ int row;
  cout<<"\nEnter number of rows for pascal triangle: ";
  cin>>row;
  printTriangle(row);
  return 0;
}
```

Output:

```
1 #include<iostream>
2 using namespace std;
3 int fact(int p)
4 { int res=1;
5   for(int i=p;i>1;i--)
6     { res*=i;
7     }
8   return res;
9 } int BinoCoef(int n,int r)
10 { int res;
11   res=fact(n)/(fact(r)*fact(n-r));
12   return res;
13 } void printTriangle(int n)
14 { for(int l=0;l<n;l++)
15   { for(int m=0;m<=l;m++)
16     { cout<<"t"<<BinoCoef(l,m);
17     }
18   cout<<endl;}
19 }
20 int main()
21 { int row;
22   cout<<"\nEnter number of rows for pascal triangle: ";
23   cin>>row;
24   printTriangle(row);
25   return 0;
26 }
```

Enter number of rows for pascal triangle: 5

```
1
1 1
1 2 1
1 3 3 1
1 4 6 4 1
```

=== Code Execution Successful ===
